

Construction and Development Standards

All contractors or developers engaged in construction or development on or related to Ada County Drainage District No. 3 (“District”) drainage facilities shall comply with the standards and technical specifications of Sections 200, 300, 400, 500, 600, 700, 800, 1000, and 2000 of the 2020 Idaho Standards for Public Works Construction (“ISPWC”), or the then current edition, with all addenda and revisions thereto. This requirement may be modified in writing by the District or District Engineer, as authorized by the District Board of Commissioners. Application of the ISPWC or other requirements related to specific projects is solely within the discretion of the District and District Engineer.
